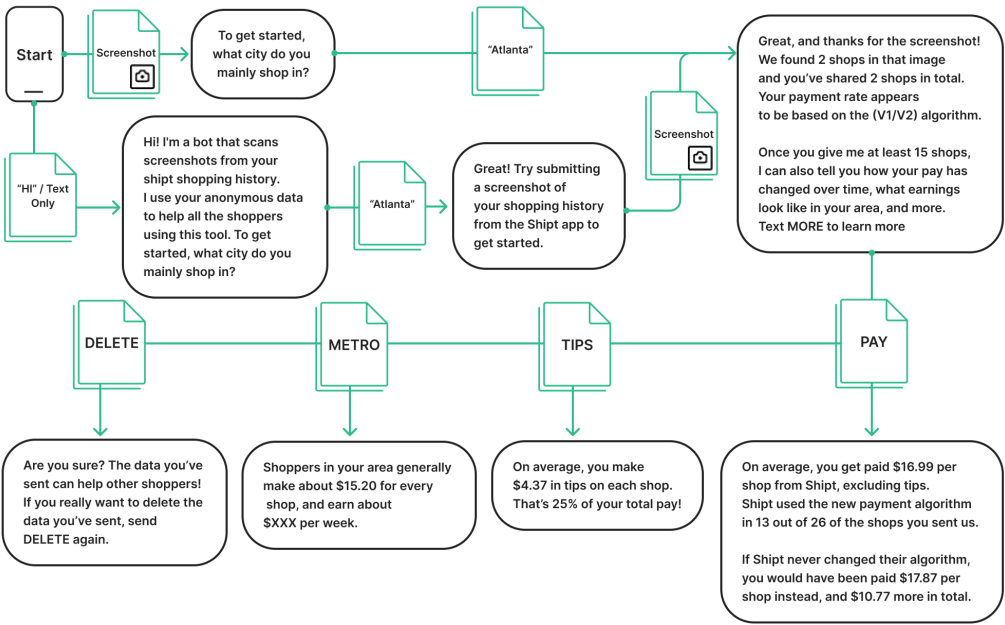

Fig. 1. One easy way of presenting multiple illustrations side by side is to use a pattern of knitr with here.

Table 1. Shipt Calculator commands available to workers.

| Command | Description | Example Response |
|---------|---|---|
| METRO | Compare pay to workers in same metro area | Shoppers in your area generally make about 15.20 for every shop, and earn about 423 per week. |
| PAY | Pay and algorithm information | On average, you get paid 16.99 per shop from Shipt, excluding tips. Shipt used the new payment algorithm in 13 out of the 26 shops you sent us. If Shipt never changed their algorithm, you would have been paid 17.87 per shop instead, and 10.77 more in total. |
| TIPS | Average tip and percentage of total pay in tips | On average, you make 4.37 in tips on each shop. That's 25 percent of your total pay! |
